		Between 8 a.m. and 2 p.m. on 27 November 1953, 16 MiG-15 and 2 Yak-lls were observed at Parndorf (P 48/X 77) airfield. The eastern edge of the field could not be observed. There was a 6/10 overcast at an altitude of about 1,500 meters, an easterly wind of about 8 km/h, and visibility of about 15 km. No air activity was conducted. Only little activity by officers and EM was observed in or near the temporary buildings which apparently were occupied. About 100 men entered the messhall at noon.

There was a 6/10 overcast at an altitude of about 1,500 meters, an easterly wind of about 8 km/h, and visibility of about 15 km. No air activity was conducted. Only little activity by officers and EM was observed in or near the temporary buildings which apparently were occupied. About 100 men entered the messhall at noon. The AA gun emplacement was guarded by soldiers wearing red-bordered black epaulets and occupied by 6 x 37-mm AA guns. No changes were observed in the status of the fuel dump, the battery charging station, the temporary building with telephone connection, or the antenna masts. A radio truck with three rod antennas was still parked near the antenna masts. The radar station still consisted of a Kniferest-type radar set and a Fishnet-type
